

Roof structure and jumbotron connector are coincidentally mated at this surface on all edges since they were made to have the same dimensions

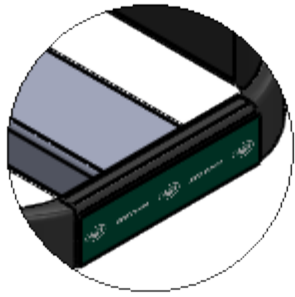

The face of the longer part of the connector has the same width as the face of the smaller side of the jumbotron, so two faces on each side and 1 edge were mated to make them align

The face of the shorter part of the connector has the same width as the face of the longer side of the jumbotron, so two faces on each side and 1 edge were mated to make them align

ITEM NO.	PART NUMBER	QTY.
1	Top stairs	1
2	Jumbotron connector	1
3	Jumbotron	1
